FOOTNOTES

Colour Identification of Piston Springs

Available range of piston springs in mounting order of heaviness for horizontal carburetters up to 1¾" throttle and downdraughts up to 1¼" throttle

Paint on end coil	**Load**
Light Blue	2½ oz.
Red	4½ oz.
Yellow	8 oz.
Green	12 oz.

Special only to HI type 1⅛" throttle horizontal carburetters

Green and Black	5 oz.

It should be noted that some pre-war carburetters using bronze sand-cast bodies cannot always be supplied as complete replacement sets. The main sub-assemblies, such as piston units, jet assemblies, or float-chamber units, may only be available, but the sand-cast body is not.

It should be remembered, however, that these sand-cast bronze bodies were practically indestructible, and the fitting of an oversize throttle spindle is generally all that is necessary as a repair after first reaming out the throttle spindle bores.

The prices of these carburetters are given in Service Sheet AUC.9614.
